

## **BIOL 4699**

### **Ecology and Biodiversity Internship**

We are coordinating this exciting course for the past 10 years. This course aims to offer students the opportunities to gain work experience in the Industry/NGO's/Research Lab's related to their Ecology Major. The workplace learning experience would be of great benefit to the students to apply their knowledge gained in the study to the real work environments, and thus to explore future carrier in that field of experience.

Who can take this course: Year 3 UG students of Ecology and Biodiversity major

When it is offered: Whole Year – Students need to gain an internship experience in industry, NGO's, government or research laboratories at least for 2 months

#### Tips for Students

- Consult your major coordinators (Dr Rajan) for external job opportunities in your discipline
- Consult your teachers for summer helper opportunities
- Seek a relevant job in your discipline yourself and obtain the consent of your external supervisor (for filling in the one page assessment form for you)

**This Internship Course is important part of experiential learning, for carrier identification and hand on training**
